

Overview of the GIVD-registered databases

Falko Glöckler

Abstract: The contribution lists all 182 vegetation-plot databases registered in the Global Index of Vegetation-Plot Databases (GIVD) as of 12 July 2012. For each database, the GIVD ID, the proper name, and, where applicable, a descriptive subtitle, as well as the number of non-overlapping plots are given. The databases are arranged by their GIVD ID and grouped according to continents. For each database it is indicated whether it is presented with a Long Database Report, a Short Database Report, or not at all in this volume and the web link where up-to-date metadata are available.

Keywords: database report; ecoinformatics; Global Index of Vegetation-Plot Databases.

Abbreviations: GIVD ID = unique identifier in the Global Index of Vegetation-Plot Databases; LDR = Long Database Report; SDR = Short Database Report; URI = Uniform Resource Identifier.

GIVD ID	Database: name – subtitle	Non-overlapping plots	Report	Page	URI
