

Table of Content

Foreword	7
About the book – an introduction	8
General acknowledgements	11
1. Climate	13
1.0 Seasonal prediction and regional climate projections for southern Africa.....	14
1.1 Cooperation of meteorological services within SASSCAL on improving the management of observed climate data.....	22
1.2 Analysis of Climate Data Application (ACD-App)	30
1.3 Key Entry Form Application to digitize climate data (keyEntry-App).....	31
1.4 Application to import climate data into CLIMSOFT (import-App)	32
1.5 Gridded maps of climate data for southern Africa	33
1.6 SASSCAL WeatherNet: present state, challenges, and achievements of the regional climatic observation network and database	34
1.7 Towards an integrated pan-African observation network for long-term climate change monitoring: A web-based tool for collaborative data collection and analysis.....	44
1.8 Predictability of daily precipitation using data from newly established automated weather stations over Notwane catchment in Botswana	46
2. Water resources	53
2.0 Water research in southern Africa: Data collection and innovative approaches towards climate change adaptation in the water sector	54
2.1 Deep, semi-fossil aquifers in southern Africa: A synthesis of hydrogeological investigations in northern Namibia	66
2.2 The long road to sustainability: integrated water quality and quantity assessments in the Cuvelai-Etosha Basin, Namibia	75
2.3 Water resources in the Cuvelai-Etosha Basin	84
2.4 Groundwater quality, quantity, and recharge estimation on the West Coast of South Africa.....	86
2.5 Determinants of spatio-temporal variability of water quality in the Barotse Floodplain, western Zambia	96
2.6 Monitoring water quality of the Upper Okavango Delta.....	106
2.7 The SASSCAL Data and Information Portal	112
2.8 Semi-arid catchments under change: Adapted hydrological models to simulate the influence of climate change and human activities on rainfall-runoff processes in southern Africa	114
3. Risk management	131
3.0 Risk management – a conceptual foundation	132
3.1 Monitoring flood and drought events – earth observation for multiscale assessment of water-related hazards and exposed elements	136
3.2 The Extreme Climate Index (ECI), a tool for monitoring regional extreme events	144
3.3 Are large classical gully systems inactive remnants of the past? A field-based case study investigating sediment movement.....	146
3.4 Impact of mining on the environment and water resources in northeastern Angola.....	155
3.5 Drought sensitivity in the Cuvelai Basin: empirical analysis of seasonal water and food consumption patterns	160

4. Rangelands	169
4.0 Rangeland monitoring and assessment: a review.....	170
4.1 Acacia trees modify soil water dynamics and the potential groundwater recharge in savanna ecosystems	177
4.2 Forage quality and availability for large herbivores in southern African rangelands	187
4.3 What is quality for a ruminant? A short introduction to the meaning of plant chemical composition measurements	197
4.4 Open-access database – HERBFEEDS on nutritional quality of food plants for herbivores	200
4.5 Quality of wild herbaceous legumes and its role in livestock nutrition.....	202
4.6 Impacts of fire history in a semi-arid woodland savanna.....	207
4.7 Impact of bush encroachment management on plant response and animal distribution.....	219
4.8 Initial experiments on intensified use of rangelands through enhanced water and nutrient cycling	226
5. Food security	235
5.0 Food security through improved farm management	236
5.1 Deforestation for agricultural expansion in SW Zambia and NE Namibia and the impacts on soil fertility, soil organic carbon- and nutrient levels.....	242
5.2 Farmer-wildlife conflicts in rural areas of eastern Zambia	251
5.3 Diversity of wild herbaceous legumes in Southern Africa, their associated root nodule bacteria, and insect pests.....	257
5.4 Increasing yields of cereals: benefits derived from intercropping with legumes and from the associated bacteria	265
5.5 Germplasm evaluation for climate adaptation and drought tolerance: The cases of local varieties of maize in Zambia and cowpea in Botswana	272
5.6 Grain yield water use efficiency of cowpea (<i>Vigna unguiculata</i> L. Walp.) in response to planting dates in Botswana.....	282
5.7 Sustaining rural livelihoods through an integrated landscape approach.....	288
6. Forest resources	295
6.0 Woodland resources and management in southern Africa.....	296
6.1 Patterns of above-ground biomass and its environmental drivers: an analysis based on plot-based surveys in the dry tropical forests and woodlands of southern Africa	309
6.2 Seeing deforestation in Zambia – On the discrepancy between biophysical land-use changes and social perception	317
6.3 Artificial and assisted natural regeneration of socio-economically important southern African tree species	324
6.4 Development of a regional masters programme on dryland forestry.....	332
6.5 Impact of fire on the <i>Baikiaea</i> woodlands	334
6.6 Market analysis to assess timber products from dryland woodlots and farm forests in South Africa	336
7. Land cover dynamics	343
7.0 Remote sensing-based environmental assessment and monitoring – generation of operational baseline and enhanced experimental products in southern Africa.....	344
7.1 A radar- and LiDAR-based earth observation system for monitoring savanna woody structure in southern Africa.....	355
7.2 Long-term land use change analysis in south-central Angola. Assessing the trade-off between major ecosystem services with remote sensing data	360
7.3 Collaborative Postgraduate Programme in Applied Science in Earth Observation, Geographic Information Systems and Remote Sensing	368
7.4 Determining the degree of deforestation in the Omusati Region, northern Namibia, with the aid of drone imagery	370
7.5 Potential use of 3D-derived products generated from unmanned aerial vehicle (UAV) imagery for monitoring forest degradation and woodland structure changes in the Namibian dry woodlands	378

8. Biodiversity	381
8.0 Biodiversity observation – an overview of the current state and first results of biodiversity monitoring studies.....	382
8.1 Amphibians and reptiles of the Tundavala region of the Angolan Escarpment.....	397
8.2 Annotated checklist of cockroaches and termites of Zambia (Arthropoda: Insecta; Blattodea)	404
8.3 Diversity patterns of woody vegetation of Kgatleng District, Botswana.....	416
8.4 SASSCAL Photo Guide to Plants of Southern Africa	424
8.5 Vegetation survey of the woodlands of Huíla Province	426
8.6 Seasonal changes of biodiversity patterns and habitat conditions in a flooded savanna – The Cameia National Park Biodiversity Observatory in the Upper Zambezi catchment, Angola.....	438
8.7 Online presentation of the SASSCAL ObservationNet.....	448
8.8 Vegetation dynamics in the Namaqualand Hardeveld – observations from 17 years of annual monitoring	450
8.9 BIOTABase – a unique software to handle complex biodiversity observation data and environmental data	458
8.10 The response of small mammal communities to low and high fire recurrences in Kafue National Park, Zambia.....	460
8.11 Climate, fish, and people in Zambezian fisheries, with emphasis on a natural flood cycle in the ephemeral Lake Liambezi	466
9 Task overview	480
10 Further reading	488
